Gravity Filling System

GPM GFS1-4

The Gentile Packaging Machinery Gravity Filling System is a semi-automatic filling system with 1-4 filling nozzles that are capable of filling liquids into bottles ranging from 4oz to one gallon. Can be purchased with one to four nozzles, and is easily and affordably upgraded from one nozzle to multiple nozzles as production needs increase.

In semi-automatic mode, the filling cycle is initiated when the operator pushes a foot pedal, which lowers the nozzle into the bottles to begin filling. When bottle is full, the operator releases the foot switch to complete the cycle.

The GPM GFS1-4 can be easily upgraded to an automatic filling system with the addition of a shuttle system, controls and conveyor.

Gentile Packaging Machinery Gravity Filling Systems are built tough, in the USA. Like all of our machinery, GPM Gravity Fillers can be customized to your specific needs. Below are standard specifications.

Product Specifications

Product Hopper - 28 gallon

Dimensions - 83"h X 29"w X 22"d

Weight - 138 lbs

Air Powered - requires 80 psi

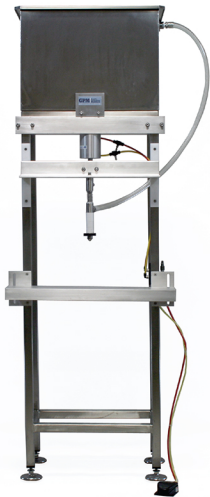

All contact parts are 304 or 316 Stainless Steel

Available Options

Hand Switch operation

Overflow Hopper for faster filling speeds

Nozzle sizes from 1/4" to 1" available
