

GPM Rotary Accumulators

Gentile Packaging Machinery Rotary Accumulators are completely constructed using stainless steel, and use variable speed motor drives making them ideal for any packaging line. GPM Rotary Accumulators have adjustable table height, and come with adjustable stainless steel bottle guide rails, making them easy to integrate into any line. The 11 gauge laser cut 304 stainless steel top plate is mounted on a 1/2" ground aluminum plate that rides on rubber casters for a remarkably smooth operation. GPM Rotary Accumulators are built tough in the USA, and can be customized to meet your specific needs.

Product Specifications

Working Height: 36" +/- 2" (levelers included)

Weight: Approximately 350 - 550lbs (varies with size)

Table Diameter: 12", 24", 30", 36", 42", 48", and 60"

Load Capacity: up to 600lbs

Rotation Speeds: 0-8 rpm

Power Requirements: 110 Volt, 15 Amp, single phase

Speed Control: DART

Motor: Dayton 1/4 HP

Available Options

Rolling, Locking, Leveling Casters for Easy Mobility

Stainless Steel Side Panels

Custom Table Sizes

Bottle Loading Trays

GPM 30" Rotary Accumulator
with Stainless Steel Side Panels

Adjustable table height and
guide rails for easy integration
into any line
